

# Tree-sure Hunt!

One of the ways we can identify our native rakau/trees is by looking at their leaves.

Each tree has adapted to their environment in different ways, and this is reflected in the size, shapes and textures of their leaves!

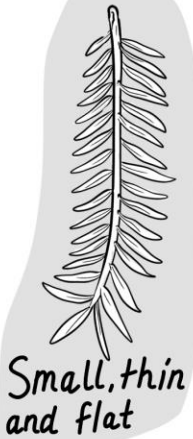

Can you match each leaf with its tree?

Long, stiff and sharp

Tiny and soft

Scale like

Horoeaka

Lancewood

Oval and serrated

Small, narrow, and pointed

Hand shaped
